

Introduction

Beself Brands is a group of lifestyle and home brands that empowers people to be their best selves through proprietary products that encourage interests and passions, distributed via marketplaces and our own channels. In May 2025, **we became the first Spanish company to issue tokenized shares** under **Law 6/2023**, offering new investors a modern and accessible way to participate in our growth.

Business Plan

The tokenization project for the company's shares, **the first of its kind in Spain**, aims to support territorial expansion and the diversification of sales channels, as outlined below:

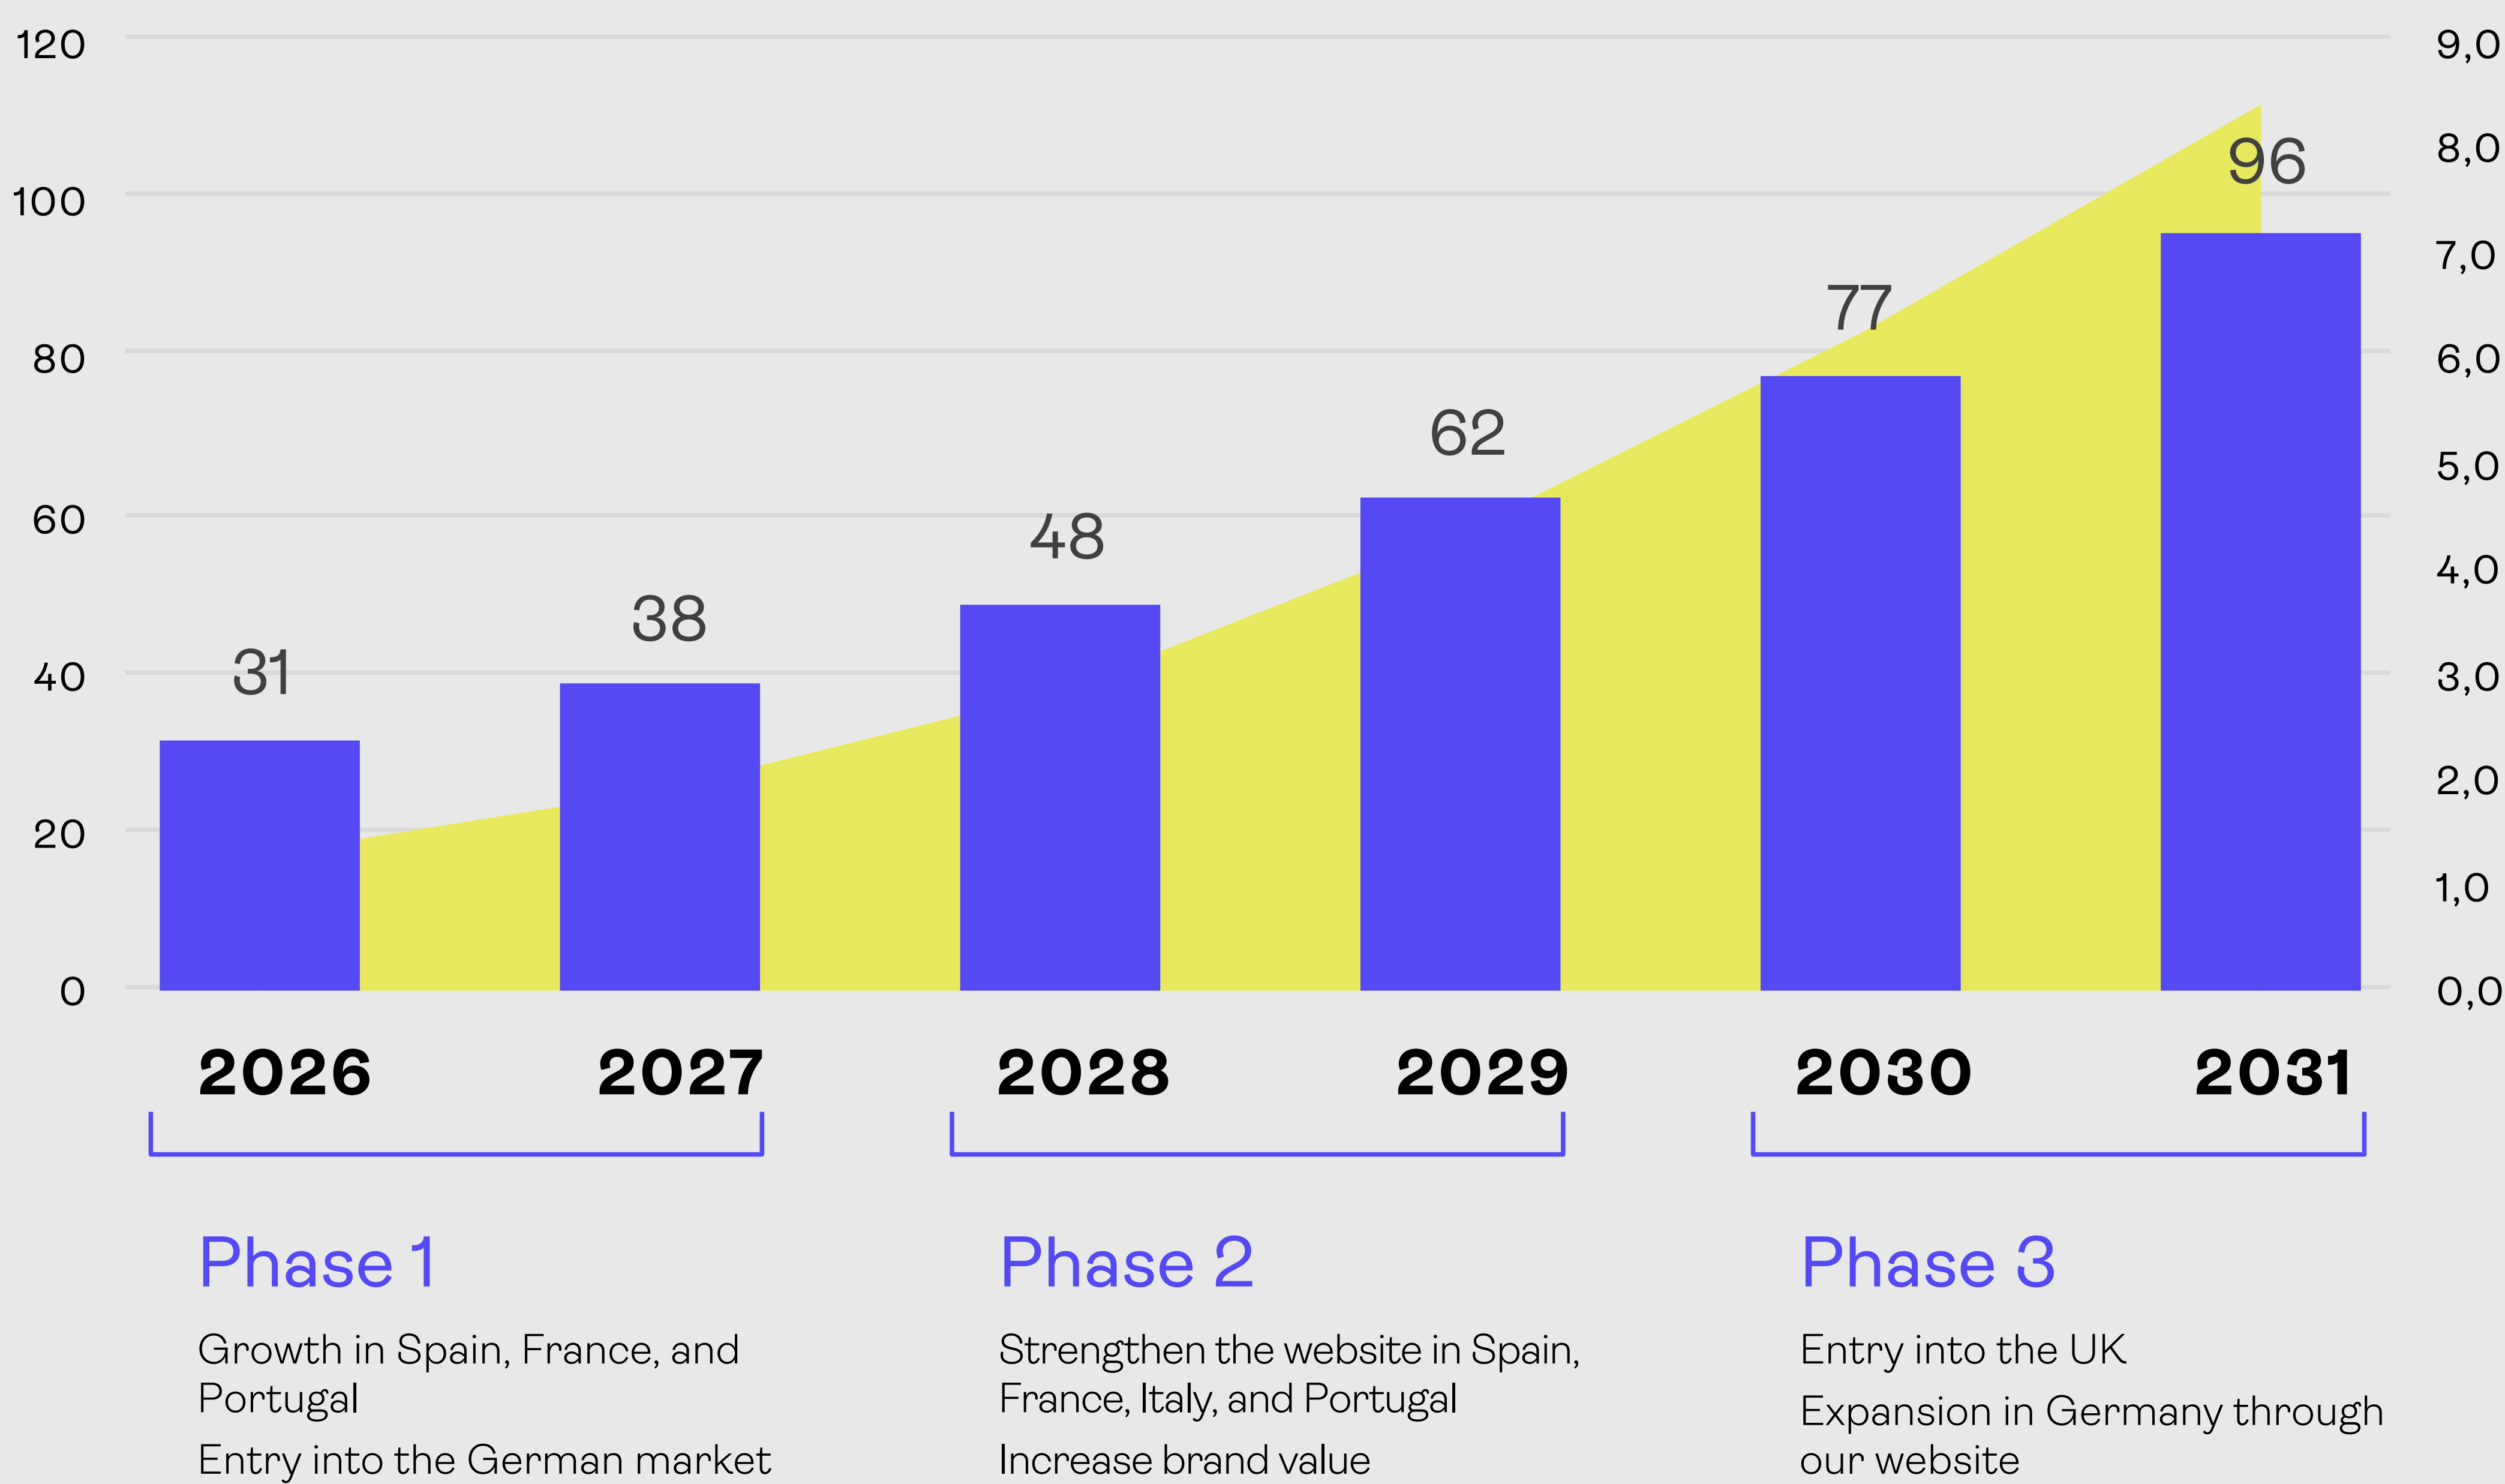

Sales and Net Profit (€M)

Investors will be able to purchase Betoken (www.betoken.io) in four phases.

Each sales phase increases the unit value of the token, benefiting those investors who join earlier:
